

# FAA CIO Focus

---

- Ensure that strategic and business views drive the formation of information and technology architecture, policies, and standards.
- Ensure that IT investments are optimized across all agency groups and over a full range of cost tradeoffs.
- Provide continuous improvement to the processes used to acquire, operate, and regulate IT systems.
- Manage information and databases in an effective and coordinated fashion across the agency.
- Ensure that standards and policies are in place to provide security for the critical information architecture of the agency.
